IBM

Jesus Rios

Research Scientist
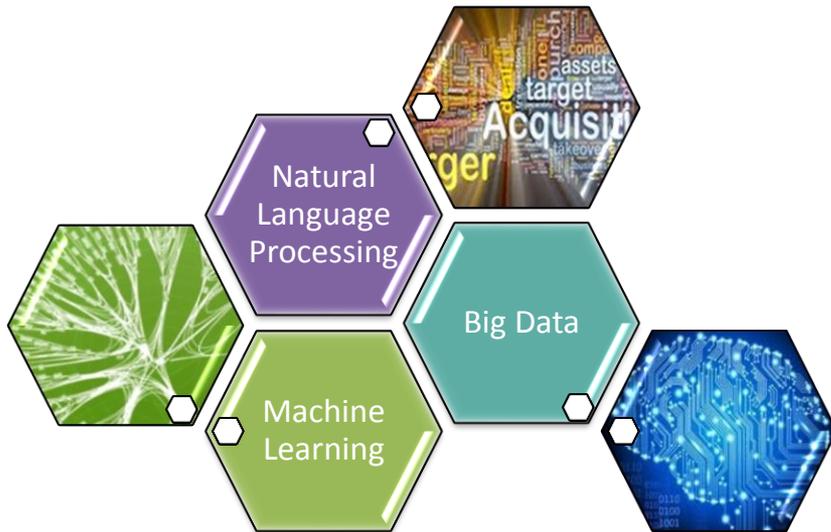

Cognitive Computing

Natural Language Processing

Big Data
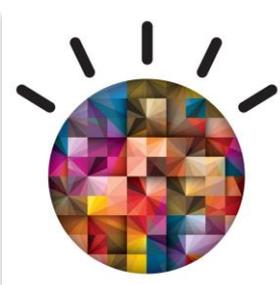

Machine Learning

Leverage vast quantity of structured and unstructured data to improve decision-making

What we bring

- Machine learning/ meta-learning
- Ensemble modeling
- Active learning
- Natural language processing
- Decision analytics
- Expert judgment elicitation tools
- Uncertainty modeling
- Predictive analytics
- Value of information

What we are looking for

- Methodologists, Psychometricians, Behavioral scientists
- Domain expertise
  - geo-politics, economics, sociology
- Software and Systems developers

Prof. David Budescu Judgment and Decision Making Research Group

- Expertise and experience in
  - elicitation and evaluation of probabilistic judgments and forecasts
  - DM experiments by individuals and by small groups in lab and online
  - Modelling of aggregation processes
  - Modern psychometric and statistical techniques
