

The University of Massachusetts Dartmouth (UMassD) is one of the five campuses in the UMass system, located in the SouthCoast region of Massachusetts.

The UMassD team specializes in cutting-edge fields, including AI/ML for communications and networking, software-defined radio, acoustic communications, optical communications, and system resilience testing and evaluation.

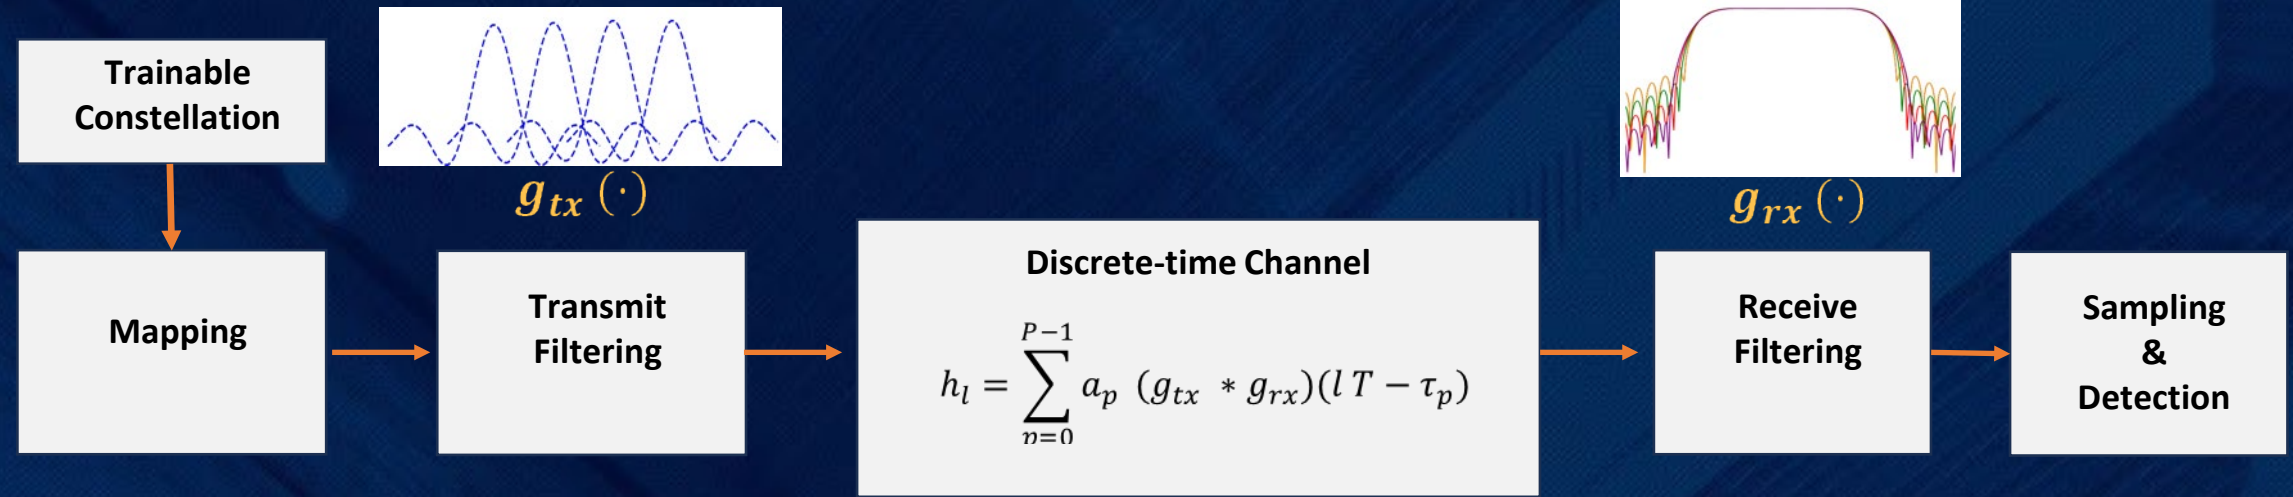

Aura is a Boston based company that has developed low power waveform for high-performance 5D situational awareness without the harmful effects of interference, jamming and multipath.

With deep expertise in Synthetic Aperture Radar imaging and 3G/4G/5G wireless communication systems, Aura developed wideband software-defined platform for RF sensing, imaging, and communications. The architecture their solution is massively scalable for the management and security of future mobility applications.

Algoptimal is a trust capability developer and systems integrator, modernizing and optimizing industries for humanity.

With deep expertise in airport modernization, Algoptimal empowers stakeholders to maximize operational efficiency while maintaining the highest standards of safety.

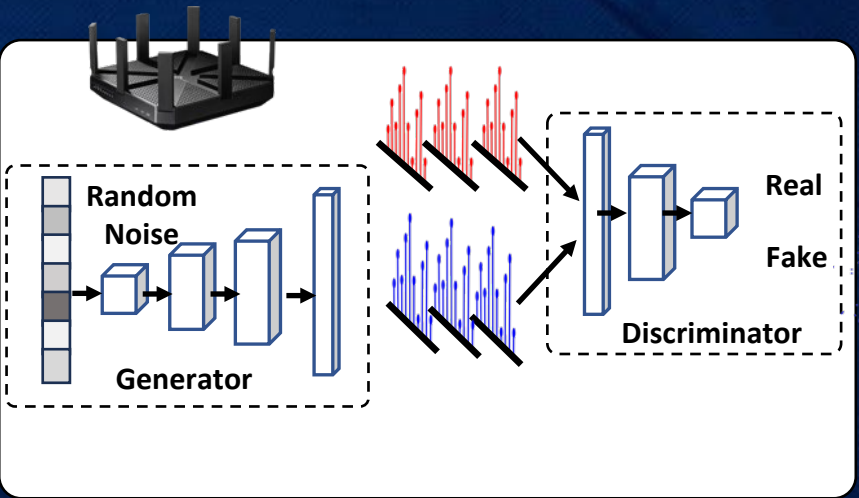

# Generative AI

## 5G Spoofing Detection

## Anti-Eavesdropping

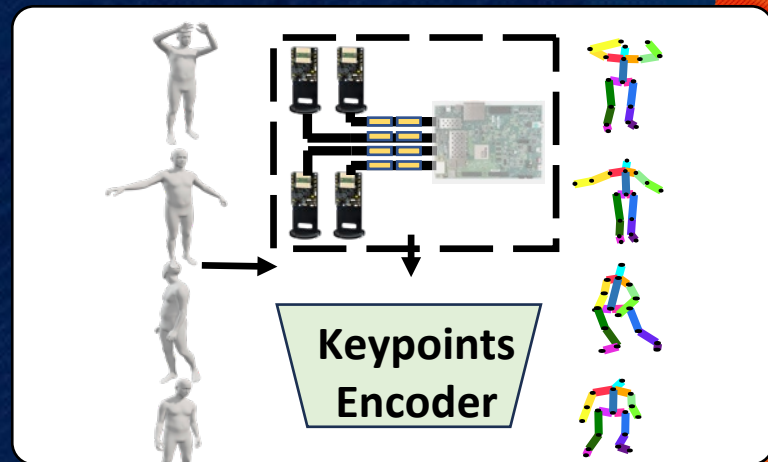

## ISAC Human Pose Sensing

GAN

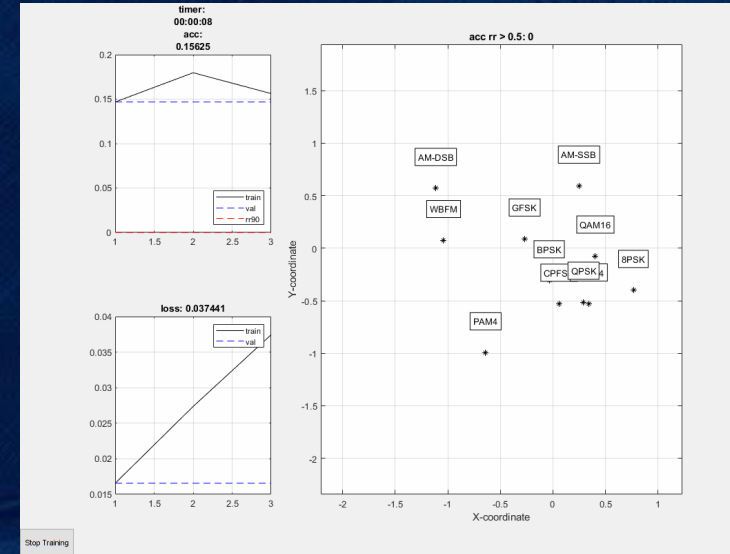

Diffusion Model

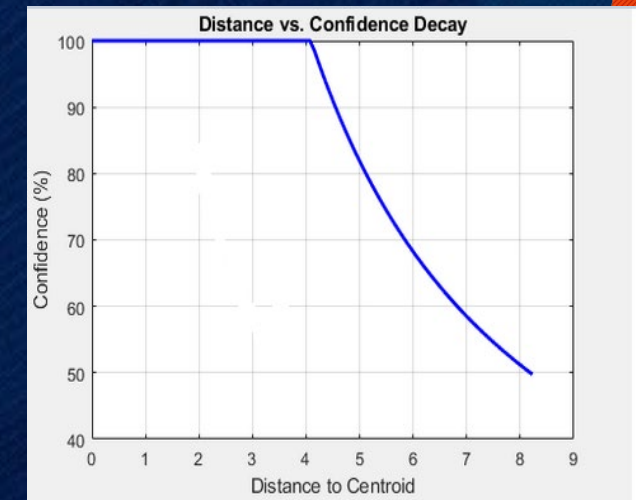

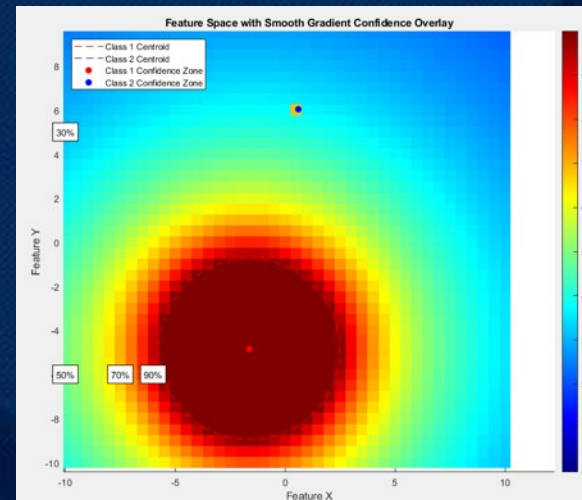

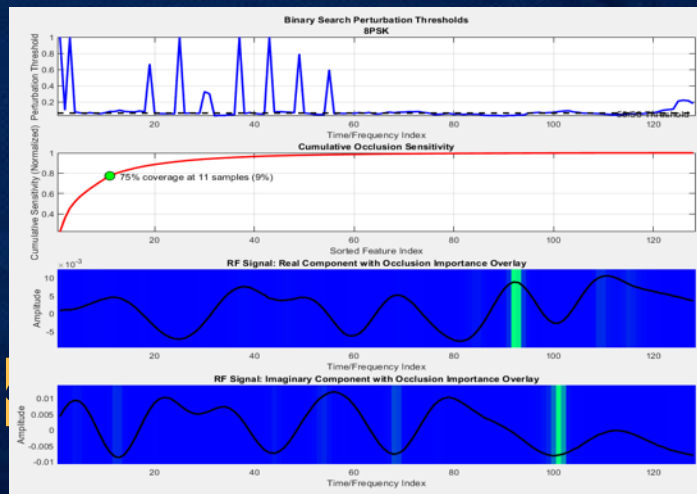

Transformer

# Explainable AI/ML

## Training Visualization and Reasoning Process

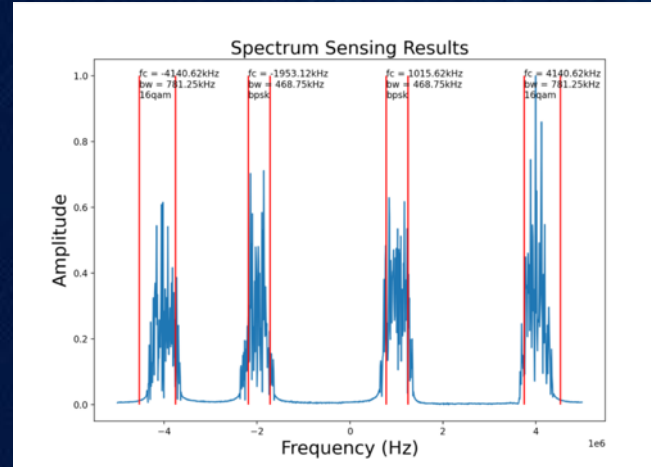

## Transparent and Understandable Machine Learning Models

# EMS Sensing & Monitoring

## EMS Sensing & Classification

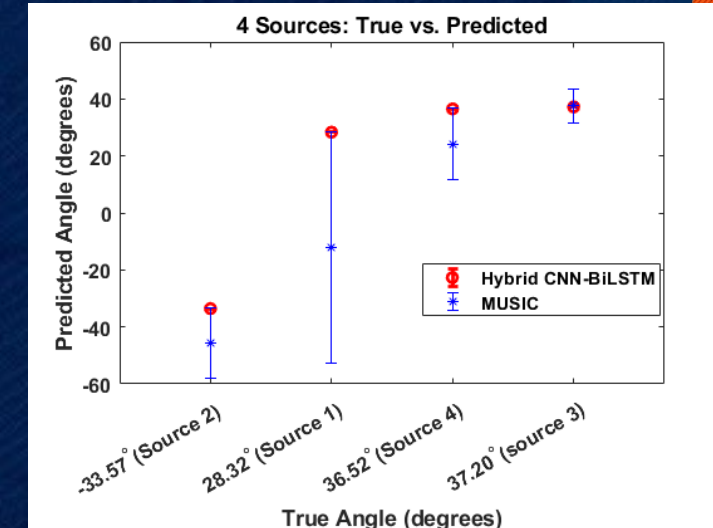

## 8-Element Array Setup

## ML-based Angle-of-Arrival Estimation

Number of Sources	Method	Mean RMSE (Degrees)
2	ML	$14.60e-3^\circ$
	MUSIC	$24.67^\circ$
3	ML	$4.5e-3^\circ$
	MUSIC	$17.73^\circ$
4	ML	$2.90e-3^\circ$
	MUSIC	$24.91^\circ$

# Aura Intelligent Systems

Patented technology for wideband RF sensing and communications for autonomous systems

Interference and clutter resilient adaptive waveform

3x power more efficient than commercial systems

Scalability in compute and data transfer

Signal constellation

RF spectrum (2GHz)

PC Control and GUI

Digital Unit

Test Environment

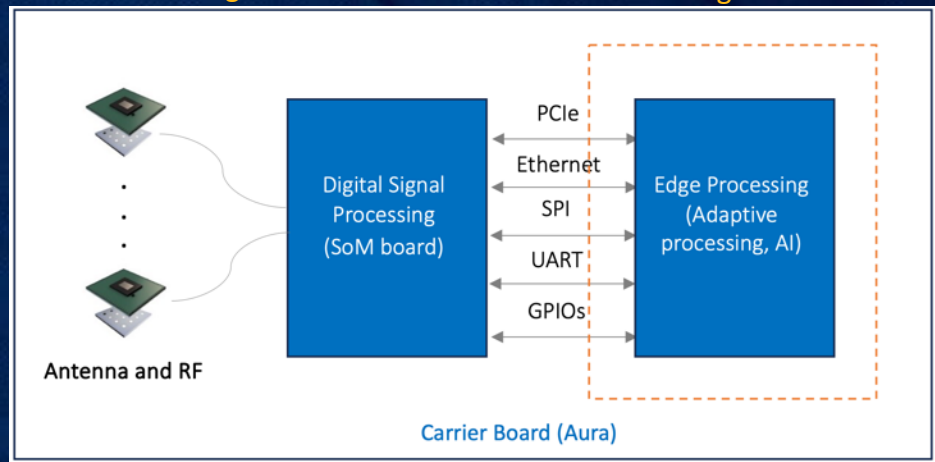

# QuadRay™ Platform for Sensing, Communications, and Signal Intelligence

RF and Digital

Edge AI Processing

Category	Antenna and RF	Digital Processing	Edge Computing
Sub-system			
Capability	Distributed antenna array MIMO sensing and communications 2GHz RF per channel 40dBm per module	Fully programmable Imaging radar Waveform processing 16 x 2Gbps ADC	Integrated FPGA and CPU RF data processing AI inference
Components	Sivers 2D phased array	AMD-Xilinx Zynq UltraScale+™ RFSoc	AMD-Xilinx Versal™ AI Edge XA
Size	12" x 8" x 2"		8.1" x 7.5" x 2.35"
Power Supply	AC Input: 100~240V, 50-60Hz DC Output: 12V, 120W Can be battery powered		AC Input 100~240V, 50-60Hz DC Output: 12V, 120W
Connectivity	Ethernet, PCIe		Ethernet, PCIe
Note	RF front-end		

# Cutting Edge Waveform for Communications and Sensing

Awarded a Korean government global R&D grant to develop connected mobility solution for LEO SAT

Prototype development & Cooperative R&D with MIT Lincoln Lab (Completed)

Air Force STTR Phase I for integrated Urban Air Mobility (Integrated sensing, communication, and PNT - Completed)

Technology and end-to-end algorithm (Completed)

## ESPERANTO Concept of Operations

*ESPERANTO (Embedded Software-defined PHY-Layer enabled on ultrawideband wireless Transceiver Solution)*

# AI-Driven Manufacturing

Algoptimal

## Advanced Analytics

Leveraging AI to analyze complex datasets for optimizing design and production processes.

## Information Modeling

Utilizing BIM to create detailed digital representations of physical and functional characteristics of manufacturing spaces and processes.

## Auto Optimal Design

Implementing AI algorithms to automate and enhance design processes, including 'jigsaw' permutation analysis for innovative product development.

## Predictive Control

Using AI to predict equipment maintenance needs and ensure high-quality manufacturing outcomes.

### Digital Modernization

Transformation of aviation operations through advanced digital technologies.

### Mission Software

Showcasing tailored software for aviation-specific applications and operations.

### Integrated Systems

Highlighting the integration of various systems for streamlined airport and flight operations.

### Enabling Technology

Emergent and prototyped technologies that enable improvements in air travel and operations.

### Field Support

Detailing the support services provided for on-the-ground aviation operations

### ODM & OEM

Original Design Manufacturers and Original Equipment Manufacturer in the aviation sector.
